

# Idris Jafarov

Nariman Narimanov st. 6/21, apt. 37 Sumqayit,  
Absheron, AZ5000, Azerbaijan

Mobile: (+994)558417856

E-mail: idrisjafarov94@gmail.com Date of birth: 02.07.1994

## Qualifications

- Established competence in Network Administration and Computer Service.
- Analytical ability combined with extensive experience in conception and execution.
- Demonstrated ability to analyze, evaluate, and integrate changes.
- Handling of crisis situations in calm and capable manner.
- Proven ability to work well under pressure.
- IT/Comms Purchasing and Vendor management experience.

## Achievements/Certificates

- Cisco Certified Network Technician R/S.
- Cisco Certified Network Associate R/S.
- Cisco Certified Network Professional R/S
- Cisco Certified Internetwork Expert R&S #56364
- Cisco Certified Internetwork Expert SP (Written) #56364

## Education

2001 – 2012	High School	“Tefekkur” liseyi.
2012 – 2016	Computer Science	Baku State University (Bachelor’s degree)
2016– 2018	Applied Software	Azerbaijan Technical University (Master’s degree)

## Work Experience

June 2017 – present	Core Network Administrator	AzEdunet
---------------------	----------------------------	----------

### Main duties performed:

- Analyze and assess structures and behaviours of existing network systems including interior and exterior routing, communication links, QOS, multicast, traffic sharing, load

balancing, tag switching, traffic compression· Early life support for new and changed network segment.

- Evaluation of technology needs for the data center and assist with the migration strategy
- Ensure technical solutions meet the needs of business such as speed, cost, performance, and security
- Install, support and maintain network hardware and software infrastructure according to best practices, including routers, aggregators, switches, intrusion protection systems, firewalls
- Continuously identify, review, and recommend potential opportunities for enterprise cost-savings, service quality improvement, and operational efficiency
- Develop operational strategies such as End of Life (EOL), applicable hardware/software product roadmaps, and vulnerability management processes
- Migration of existing services to new hardware
- Perform network security design and integration
- Provide network and host based security, incident response, firewall and VPN management and administration
- Assist in the development of guidelines and procedures for administration and security best practices

**February 2017 – May 2017**

**Network Administrator**

**IT Solutions**

**Main duties performed:**

- Administration of networks based on Cisco active network equipment (network switches: 2960, 3560, 3750, 4900, 4500, 6500, 1700, 1800, 2900 and 3800 network switches, ASA 5500 routers; IDS, IPS and MARS firewall)
- Configuration, use and error diagnostics of Cisco routers and multiplexers
- Configuring and administering Wi-Fi devices (access points and Wi-Fi controllers)
- Regulatory document development
- Plan, implement and support the network and computing infrastructure plan.

**March 2016 – February 2017**

**Network Administrator**

**ELCOM GROUP**

**Main duties performed:**

- Monitor network performance to determine whether adjustments need to be made, and to determine where changes will need to be made in the future.
- Network administration (including backup, security management, user account management, e-mail systems including e-mail web server, internet access, office systems and applications support).
- Support server, network and desktop hardware, software and applications.
- Plan, implement and support the network and computing infrastructure plan.
- Manage small to medium sized projects according to agreed upon budgets and schedules.

**Sep 2015 – Dec 2015**

**Enterprise Technology Specialist**

**MARS TECH LIMITED**

**Main duties performed:**

- Maintain and administer computer networks and related computing environments including computer hardware, systems software, applications software, and all configurations.
- Perform data backups and disaster recovery operations.

- Diagnose, troubleshoot, and resolve hardware, software, or other network and system problems, and replace defective components when necessary.
- Plan, coordinate, and implement network security measures to protect data, software, and hardware.
- Configure, monitor, and maintain email applications or virus protection software.
- Operate master consoles to monitor the performance of computer systems and networks, and to coordinate computer network access and use.
- Cisco & Huawei switch configuration in particular VLAN configuration/troubleshooting.
- Monitor network performance to determine whether adjustments need to be made, and to determine where changes will need to be made in the future.
- Analyze equipment performance records to determine the need for repair or replacement.

**Jul 2014 – Sep 2015**

**Dispatcher**

**“KATV1 Kabel Televiziyasi”**

**Main duties performed:**

- Answer to users’ inquiries regarding computer software or hardware operation to resolve problems.
- Enter commands and observe system functionality to verify correct operations and detect errors.
- Maintain records of daily data communication transactions, problems and remedial actions taken, or installation activities.
- Read technical manuals, confer with users, or conduct computer diagnostics to investigate and resolve problems or to provide technical assistance and support.

## **Skills**

---

**Technical:**

- Skilled in deploying MPLS enabled applications (L3VPN, L2VPN, VPLS).
- Deep understanding of dynamic routing protocols (BGP, OSPF, IS-IS, EIGRP).
- Switching – VTP, STP, VLANs.
- Professional troubleshooting skills regarding network infrastructure and design.
- MPLS Traffic Engineering.
- Experienced in working with network devices of the following vendors: Cisco, Huawei, Juniper, Checkpoint.
- Experience with QoS, LACP, PAgP, ACL, NAT.
- Experience in Cisco IOS 15.1 and above, Cisco IOS XE, Cisco IOS XR, JUNOS.
- Cisco Core Switches experience: 65xx, Nexus 7000, 6000, 5000, 3000, 2000.
- Experience in Network Analyzer (Wireshark).
- Experience in Cisco Routers: ASR 1000, ASR 9k, 37xx, 38xx, 39xx, 29xx, 28xx, 7200.
- Experienced in implementing and troubleshooting PIM-DM, PIM-SM, PIM S-D Mode, BIDIR-PIM, MSDP, Multicast VPN.
- Experience in deploying IP Multicast networks.

**Interpersonal:**

- Always focused on achieving results at work.
- Approaching to work with a great responsibility and dedication.
- Constantly setting goals aiming to reach them.

**Languages:**

---
